## **DATA PROTECTION**

QuerySum Ltd acts as a Data Controller in respect of its own data for managing its business, and as a Data Processor in respect of data which it hosts on behalf of its clients using QRSecured Software as a Service.

### *Data Controller*

QuerySum holds personal data about key personnel within its clients' companies, including names, business addresses, business telephone numbers and email addresses.

Such data may continue to be held after the termination of a contract with a client in order to provide after sales service or otherwise support clients' business needs.

QuerySum may also hold contact information relating to sales prospects, including individuals' names, roles, business telephone numbers and email addresses. Such information will only be obtained with the individuals' express permission.

### *Data Processor*

In providing an ID verification service through QRSecured, QuerySum provides a mechanism for clients to upload, edit and make available data about their own employees. QRSecured provides a means for the client to store sensitive information in data fields that are encrypted.

The client is responsible for ensuring that it meets the requirements of GDPR in obtaining, storing and processing its data by means of QRSecured.

## **DATA SECURITY**

QuerySum's own business data and its clients' data is stored in a dedicated virtual server provided by Amazon, hosted in London. Access to the data for verification purposes is via SSL (HTTPS).

Backups of the data are made on a daily basis and stored on a Google Drive;

<https://cloud.google.com/security/gdpr/>

Questions about Data and Security issues may be addressed to;
